Projector AES_ Hammer Tool.....	2
1. Process to be followed	2

Projector AES_Hammer Tool

The basic functionality of this screen is to add the New AES to PPM that are already created in Projector and adding them by the resource name and will map the AES in both the projector and PPM and also can set the present status of the AES.

1. Process to be followed

Step 1: Here by opening this page we will see the data table with the list of the resources and their name as per projector and their name as per (Resource details) and their present status.
