1d. Month	5
2. Data Table.....	6

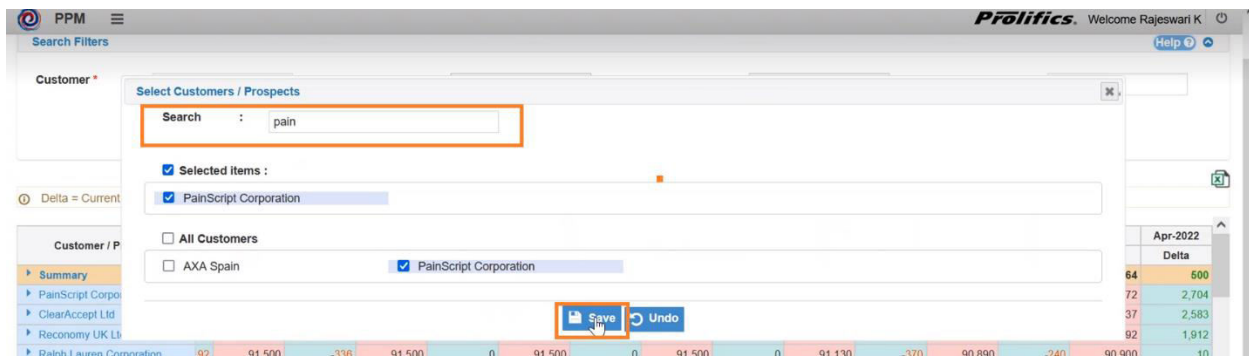

[illegible]

Third Selection is by selecting the particular customer data and viewing those details.

By Clicking on “Select” a new window populates to select the Customers,

Here we can search the Customer based on Name or can select from the list available and here we can select either single customer or Multiple customers and then click on Save.

Now by clicking on search the data related to that selected Customer will be populated.

1b. CSL

This is a filter where we can select "All" or can select the Particular customer service lead to populate data related to that CSL Customers.

1c. DP

This is a filter where we can select “All” or can select the Particular Delivery Partner to populate data related to that DP Customers.

1d. Month

In this filter we can select the Month for which the data needs to be populated.

- Before the 10th of the current Month user can view the Present Month and Previous Month Data.
- After 10th of the Current Month the Users can view only Present Month and Next coming month data. The data for previous month is not available and selection is also disabled in the filter.

The screenshot displays the 'Planned Revenue Analysis' interface within the Prolifics system. The top navigation bar includes the Prolifics logo, a user welcome message 'Welcome Rajeswari K', and a power button. Below the navigation bar, the breadcrumb 'PMO' is visible. The main section is titled 'Search Filters' and contains four dropdown menus: 'Customer *' (set to '<< ALL >>'), 'CSL *' (set to '<< ALL >>'), 'DP *' (set to '<< ALL >>'), and 'Month *' (set to 'Apr-2022'). A blue 'Search' button is positioned below the filters. A calendar dropdown is open for the 'Month' filter, showing the months of the year 2022, with 'Apr' selected.

Year 2022		
Jan	Feb	Mar
Apr	May	June
July	Aug	Sep
Oct	Nov	Dec

2. Data Table

In this table can see the data of the customers based on the filters selected.

Here in this table can see the Planned revenue projected by Project Manager on that particular day.

This planned revenue is calculated from the resource assigning and some other Factors.

A Job is being run on Background daily to calculate the Planned Revenue of that day.

Can Also see the delta in the Planned revenue from previous days Planned Revenue.

Delta of the day = Current day Planned Revenue - Previous day Planned Revenue

Positive Delta - Displayed in Colour Green.

Negative Delta – Displayed in Colour Red.
