Cadre: It is showing resources who are tagged for the projects and there cadre (EX: T1- trainee, E1-Associate Engineer)

Supervisor: Resources working under the Supervisor and supervisor name is showing.

Revenue: how much revenue is generated for a customer that we are showing in the revenue column.

- For Past Days

$$\text{Revenue} = \text{Actuals} * \text{Billing Rate}$$

- For Future & Current Days

$$\text{Revenue} = \text{Allocation} * \text{Billing Rate}$$

GM (Grass Margin): Grass Margin shows the difference between the Revenue & cost

FORMULA: GM = Revenue – Cost

- For Past Days

Cost = Actual * Roll Cost * 0.85 (If Contractor then contractor cost)

- For Future & Current Days

Cost = Allocation * Roll Cost * 0.85 (If Contractor then contractor cost)

NOTE:

- Roll cost is used for FTE & it's always multiplied by 0.85
- Contractor cost is used for Contract employee
- Actual is used when value of the past days is known
- Allocation is used when value of current & future is unknown.
